VERY HEAVY HITTING.

Locals Touched Up Sigeby of Buffalo in a Lively Manner.

There was blood on the face of the sun yesterday which may or may not be the reason the locals made such a show of Buffalo at the ball park.

Whether or not the sun had anything to do with it, from the very nature of things, purely conjectural, we are inelined to give the credit to Pitcher Delaney, who did superb work. Only four were secured by the Bisons, three of which were singles and one a double. These hits were all several innings

Buffalo scored its first runs in the third inning on errors. Conley made a single and Boyd struck out. Sigeby hit an easy one to Delaney, which the latter threw to third with the intention of cutting off Conley. The throw was a bad one and Conley secred, while Sigeby slipped around to second. O'Brien was retired from Cahill to Lebane and on Phelan's error Sigoby

The visitors did not get a man across from Delaney to Lehane and Lewer was given a base on balls, Conley reached first on Lehane's excusable error and on Boyd's two-bagger both two batsmen were retired on short in-

Much better work was done with the stick by the locals who aroused great enthusiasm among the rooters. They were more in evidence than at any game since the club went into the Eastern league.

The scoring began in the first inning. Cahill sent the ball spinning for two bases and scored on O'Brien's bad throw of a ball from Hoover's bat, the latter reaching third. Johnson struck out, Patchen filed out to Clymer and on Hess' single Hoover scored. Phelan was put out on a fly to Hoffer.

During the next five innings Scranton had only sixteen men at bat and

In the seventh the spell of Mr. Sigeby's witchery was broken, and his heretofore deceptive curves were found with ease. Hess began operations with Phelan scampered home. Lebane and Delaney were enabled to score by Cahill's single. Hoover and Johnson were retired on flies.

The locals made two hits but no runs in the eighth, but in the minth again did some terrific batting.

This time Smith led off with a single. Delaney following suit. Cabill reached force hit Smith was thrown out at the breaking. plate. At this point Johnson came to the rescue with a three-base hit, De-laney, Cabil! and Hoover scoring. Patchen sacrificed to centre field, allowing Johnson to score, Hess singled side, and scored on Phelan's double, The with side retired with Lehane. Detail score: SCRANTON.

WHIRLS OF THE WHEEL.

Cycle racing by electric lights is among the probabilities for Riverside, N. J., in the near future.

The prizes to be 'hung up" at the na-cional circuit meet in Philadelphia on tional circuit meet in Philadelp Sept. 22 aggregate \$2,000 in value. More than 1,000 cyclists are now riding in Class B. The second and third-rate men are beginning to complain, as they are un-

able to win prizes, and unless the pro-moters of race meets put class races on their programmes a large number of the unfortunate ones will have to retire, as racing for fun is not to their liking.

Cabanne, the young St. Louis rider, guessing, promises to make a good showwith ease. Heas began operations with a double and Phelan went to first on Lewse's errore. Lehane singled into right field, allowing Hess to score and Phelan to reach third. Smith flied out to O'Brien, and on Delaney's single On this comparison Cabanne deserves to Phelan scampered home. GENERAL SPORTING NOTES.

"Denver Ed" Smith and Ed Farrell met Saturday and arranged to fight for \$5,000 a side. The fight is to come off in Denver within five weeks.

Solly Smith, the California feather weight pugilist, and Frank Erne, of Buffalo, have been matched to fight ten rounds for a purse of \$800. The battle will be fought in Buffalo on Oct. 2.

The finish fight between George Corfield, the English bantam weight puglist, and Charley Kelly, of this city, will take place in Sheffield, Eng., in December. Corfield and Kelly will maul each other for \$500 a side and purse.

Tom Allen, the old time pugilist, of St. Louis, says he is willing to find any part of \$2,500 for Ed Smith, the heavy weight pugliist of Denver, to fight any man in the United States. Allensays: "I backed Smith when he defeated Joe Goddard."

Jimmie McLaughlin, the speedy amateur sprinter, of Worcester, Mass., has been declared a professional and the Amateur Athletic union warns all athletes not to compete against him under penalty of expulsion. McLaughlin and "Piper" Dou-ovan intend to make a tour of the country together.

Beauty Is No Inheritance.

Cosmetics do not beautify, but often destroy a healthy complexion. A natural rosy and healthy complexion cannot be had by the use of cosmetics, but only through the health of the body in general. Nothing is better to secure this result than the genuine imported Carlsbad Sprudel Salt when taken early in the morning before breakfast (about a small teaspoonful dissolved in a tumblerful of water). It clears the complexion and produces a healthy color. Best taken when out-door exercise can be had. Obtain the genuine article, which has the signature

Sleeping Car Porters Who Have the Long-

est Runs in the World. The only employees of the Canadian Pacific who are with the express trains all the time between Montreal and Vancouver are the sleeping car porters. They travel nearly 3,000 miles without a break, and are on the road for nearly six days. It is a pretty hard life, but at both ends of the route the porters have an opportunity to rest, though even then they hardly get suf-ficient recuperation. For two or three nights the porter is not likely to get over three or four hours' sleep a night, and he is lucky if he gets that. He is his own conductor, and collecting the sleeping car tickets and accounting for them adds considerably to his work.

Leaving Montreal at 8:40 p. m., he is certain to have a busy time at Ottawa shortly after midnight, and then he has his boots to black, and he is lucky if he gets a wink of sleep before 2 or 3 a. m. He takes a pillow and lies down in the smoking room when no passengers are there, and catches cat naps if he can. He is likely at any moment to be aroused by a bell, summoning him to one of the berths, and the bell is sure to be kept busy after day-

After leaving Winnipeg he has a comparatively easy time across the plains, though he is compelled to be up after midnight both at Regina and at Calgary. At all important stations he has to go to the telegraph office with a statement of the accommodations unoccupied in his car, so that the station agents ahead may dispose of berths. He has a busy time through the mountains.

As a rule he loses nearly his entire carload at Winnipeg, and it fills up there at once with passengers from the south. He loses his passengers again at Banff, and their places are supplied by tourists who are going on from that pleasure resort; then many of his passengers get off at Glaziar, and others come on, so that nearly all the time he has much to do in the way of keeping his accounts, besides his duties

At Vancouver he lays over for two days, and as a rule he sleeps in the car, occupying it all the time for the round trip. When he returns to Montreal he has been away fourteen days. Then he has a longer rest. He is off duty for five days, except that he has to take his turn reporting at the depot at night to assist the outgoing porter in taking care of luggage. His five days' rest puts him in pretty good condition for another two weeks' siege.

The porters say the trip is rather trying, but that there is nothing like getting used to a thing. The company pays them forty dollars a month, and they expect to make at least as much more in fees. All of them are colored men from the States, and have served on some of our best lines. They say they like the service. Once in awhile a man is switched off his regular run, which does not please him very well. For instance, he may reach Winnipeg, going east with an empty car, and he is likely to be side tracked for further orders. He has plenty of leisure then, but the fees, which form so large a part of his income, are not forthcoming, and he prefers more profitable activity.—New York Sun.

A Mystery Explained. A gentleman of this city who has taken some interest in mind reading, hypnotism, telepathy and the like, entered his office the other day, and just as he was sitting down thought of a friend whom he wanted very much to see on a matter of business. In less than a minute in walked the very

"Did you just arrive?" asked the gentle-"Drove up to the door about half a min-

ute ago," said the visitor. "Must send it to the Psychical Research society," said the gentleman, explaining what had happened.

After his visitor went away he began thinking it over. Then he suddenly recalled something he had overlooked. On passing his office through another room he had seen a gentleman reading a book with a peculiar binding. It reminded him of another book in similar binding be had been reading at a summer resort the week before. This reminded him that he thought of going back there for another week of recreation and that reminded him that his friend had been down there, too, and was expecting to go back with him, Then he wondered how many similar mysteries might be rationally explained if the connection between one's thoughts could only be re-established.-Detroit Free Press.

The Wisest Man Contradicts Himself. Napoleon was a fool more than his just proportion of time, and he had a habit of sticking to decisions made in his off hours. You may bear this in mind, that the wisest man is he who most often and freely contradicts himself. To never veer in judg-ment, and never go back on yourself, is not a mark of genius. I asked my boy the other day what the phrase "go back on yourself" meant, and his answer gives me ust the illustration I need. He was picking a row of raspberries; his answer was: "I have to go back every few feet and find berries I have missed. When Phil tells me I am not picking clean, I tell him to go

That is a wise man is one who reviews himself as often ponce a day, and then perhaps again each week. If you have a possible controversy, and have written a etter, be sure not to send it for twentyfour hours, giving yourself time to reconsider it. Perhaps a good rule is to let all letters lay by for a day, if possible. You may have written one in your fool hour. You will be surprised at least that you could have said some things, or proposed others.—St. Louis Globe-Democrat.

Where Scallops Are Found. Sixty years ago the presence of giant scallops was known in the vicinity of Castine, Me., but it is only within the last fifteen years that they have found a market. Everybody ought to learn that it is the 'heart" (which is not the heart) of the scallop which is eaten. This so called "heart" is the strong abductor muscle of the mollusk. All the rest, or the mantle,

is thrown away. In all muscular tissue there is a sweet tasting substance, and probably in the scallop this is present in large quantity. The usual method of taking the scallop is by dredging. It is believed that there are undiscovered beds of these giant scallops yet to be found off the coast of Maine.

There used to be entertained the idea that since scallops were only found near the old French settlements, they were due to accidental planting by the first colonists, but such is not the case. The Pecten naturally belongs to the whole North American coast.—New York Times.
